

It just can't stop talking....

The 7-message **Fire-Cryer® Plus** Be seen, heard and understood!

Fire-Cryer® Voice Enhanced Sounders have always been both heard and understood.

Now Vimpex are making another clear and unambiguous statement with the latest addition to the Fire-Cryer® family - the **Fire-Cryer® Plus**.

With bold styling, integrated synchronised LED strobe and 7 selectable messages from a multi-lingual library of over 300, the **Fire-Cryer® Plus** enables a standard fire alarm system to signal much more than just fire. Using just 2 wires the **Fire-Cryer® Plus** is an ideal partner for new and retrofit DDA-compliant fire systems.

The rest of the Fire-Cryer® family has also been upgraded with 7-message capability ensuring it remains the most versatile group of voice sounders on the market.

Fire-Cryer® Plus - visibility, audibility and intelligibility

FIRE  **CRYER®**

Fire ■ Bomb Alert ■ Coded Messages ■ Terrorist Attack
Public Warning ■ System Test ■ Phased Evacuation

See overleaf for information on the entire Fire-Cryer® range

Fire-Cryer[®] Voice Sounders

The new Fire-Cryer[®] family broadcasts 7 user-defined messages with 5 compatible products all synchronised on just 2 wires.

- 7 user-definable messages from a library of hundreds
- Any language accommodated
- Strobe modules allow differentiation of strobes depending alarm state
- New voice message controller makes manual message switching easy
- Low cost extensions easy due to zone extension cards

Fire-Cryer[®] Plus - 100dB(A)

This voice/strobe combination allows the user to define which of the seven messages are accompanied by the flashing strobe.

Mini Fire-Cryer[®] - 90dB(A)

Slimline base sounder for discreet mounting under fire detectors. Cover plate available for wall mounting and choice of colour to match detector.

Midi & Maxi Fire-Cryers[®] - 110 & 116dB(A)

High-powered voice sounders designed for less hospitable environments such as industrial applications, large open spaces like warehouses and factories, and areas of public gathering or transit.

Ani-Mate[®] - 95dB(A)

True (sub 400Hz) animal-friendly sounder which is suitable for use in areas that house mammals sensitive to standard electronic sounders. The Ani-Mate[®] can also be used as a tone-only sounder.

Intelligent Strobe Modules

Fire-Cryer[®] strobe modules are ideal for use in DDA-compliant systems that wish to differentiate between different stages of alarm.

Voice Message Controller - VMC

The VMC has been fully updated with enhanced synchronisation, simple zone extensions and more versatile message switching.
