

Pacific R6C Helmet Features

Torch Clip

Our range of Adaro Torch Clips can be added to provide the user with additional support in rescue missions with low visibility.

Pacific Ratchet Adjustable Headband

Sizing range from 52-64cm (downsizing adjustment kits and XL sizes available). Simple operation with a single gloved hand.

Optional Extras

- Neck protectors
- Ear defender brackets
- Range of colours available
- Custom branding available
- Padded carry bag

Kevlar®

The R6C is constructed from a lightweight but extremely tough Kevlar® reinforced composite shell, significantly contributing to user safety. With a strength-to-weight ratio between 15-28 times that of plastic helmets, Kevlar® reinforced helmets are resistant to damage from the effects of UV radiation from sunlight.

Kevlar® reinforced fibreglass composite shell means safety can be delivered in a lightweight format.

Lightweight

A lightweight helmet with less mass than those manufactured from thermoplastics, and with a very low centre of gravity so that all users can concentrate on their job with no detrimental effects on wearer health & safety.

Face Protection

A clear polycarbonate eye protector provides high speed particle impact protection. The face shield is an optional extra for full face protection.

Headband Material

Vinyl headband as standard with leather or merino as optional extras. Easily removable and replaceable.
